

Did You Take This Trade? DDM

How does a stock move 18.7% in 2-3 weeks but yet **you make a 67% return without using options?**

DDM

Since the Oct 13 lows through Oct 29, DDM went from 29.22 to 34.69 for a 5.47 points gain or 18.7% in a buy and hold style of management.

But in the same time period, DDM has given **All About Trends** paying subscribers a **total gain of 19.57 points -- that's a return of 67% in just over two weeks!**

The chart below shows two trades we alerted our paying subscribers to:

The total profit to our paying subscribers is \$3,342.00! That's based on an investment of 200 shares each time or cash investments of \$5,844 and \$6,210. And that's just two trades. What would a profit of \$3,342 from two trades do for you? Don't let these big profits pass you buy. [Subscribe](#) today.
