

Did You Take This Trade?
ENER
Energy Conversion Devices
21% Gain in 24-Hours!

What would a 21% gain in 24-hours do for you?

Our weekend paying [subscriber](#) newsletter included ENER on the watch list as it was poised to potentially break from a double bottom down to up change in pattern. The stock triggered a trade to the long side as it broke above the pink downtrend line.

Our paying [subscribers](#) received an email alert that ENER was triggering a trade at 21.82. **Just 24-hours later, our paying subscribers locked in a gain of 21%!**

Here's the set-up our paying [subscribers](#) were alerted to in our weekend watch list:

Here's where ENER sat 24-hours later:

If you were a paying [subscriber](#) and had taken this trade, **you would have made over \$900 on one trade in 24 hours!** And the best part is, this was based on a conservative position of 200 shares.

Don't miss the next trade. When you are a paying [subscriber](#), you receive:

- our current watch list
- an email alert when a stock on our watch list triggers a trade
- an email alert when we are locking in our gains
- a partner dedicated to your success in the investing in the stock market

At All About Trends, this is what we do. We have a plan and we trade our plan. And in this market, our plan is to get in with a conservative position, get our points, get out and then do it again with the next set-up.

"After being in the markets for 12 years, I can see how valuable your knowledge, info and trading style is...just seems like a winning combination. Thanks for sharing it with us all. Your work is greatly appreciated,"
Jay -- Salt Lake City, Utah
