

Did You Take This Trade? [RIMM](#)

Did you know you can significantly outperform mutual funds and brokers by making just one modest trade a week? **Our [subscribers](#) locked in 9.5% gain in just over 24-hours from [RIMM](#) yielding a profit of \$708.00!**

One gain like that a week will earn you \$36,816 a year! And if you have a portfolio of \$50,000 that's **a 74% gain** which will easily outperform most mutual funds and brokers that manage to a benchmark average.

In today's market, success isn't about trying to hit a grand slam or score on a hail mary pass. Instead, it's all about hitting singles and making first downs and doing it over and over again. That's how to get ahead in today's market.

This is how we helped our paying [subscribers](#) earn their profits in [RIMM](#):

1. Paying [subscribers](#) receive a current watch list in each newsletter with stocks poised to break free from patterns that have in the past yielded significant short-term gains.

SUBSCRIBERS ALERTED TO [RIMM](#) AS AN IDEAL LONG SIDE SET-UP IN OUR WEEKEND NEWSLETTER

[RIMM](#)'s set-up made our list because it had formed a double bottom. A double bottom is often the first sign that a stock is about to change its trend -- in this case from down to up.

When we see this, we draw a pink line connecting the highs of its downtrend. An upside break of the pink line triggers a trade to the long side. This move is what we call a First Thrust Up. It is often one of the most explosive moves a stock can make. Think about it, if a stock has been in a downtrend for some time and the sellers have finally been exhausted, all that's left is buyers to step in to take advantage of bargain prices. When this is combined with a market moving to the upside, you have the recipe for an explosive move.

2. When [RIMM](#) triggered a trade by breaking above the pink pullback off highs line at 37.11, we issued a Trade Trigger email alert to our paying [subscribers](#).

3. [RIMM](#) took off and just one-day later, we sent an email to our paying [subscribers](#) to lock in their gains -- a gain of 9.5% in just over 24 hours!

All it takes is just one trade like this a week.
