This is how we helped our paying [subscribers](#) earn their profits in [VNUS](#):

1. Paying [subscribers](#) receive a current watch list in each newsletter with stocks poised to break free from patterns that have in the past yielded significant short-term gains.

**SUBSCRIBERS ALERTED TO [VNUS](#) AS AN IDEAL LONG SIDE SET-UP IN OUR WEEKEND NEWSLETTER**

When a stock is in an uptrend, it usually forms a series of mini-downtrends as it consolidates its gains before making a new move higher. We call this Pullback Off Highs. This is one of the most bullish long-side set-ups.

When we see this, we draw a pink line connecting the highs of its downtrend. An upside break of the pink line triggers

a trade to the long side.

2. When [VNUS](#) triggered a trade by breaking above the pink pullback off highs line at 18.66, we issued a Trade Trigger email alert to our paying [subscribers](#).

3. As [VNUS](#) was nearing resistance at its old highs, we sent a Locking In Gains email alert to our paying [subscribers](#) to lock in their gains at \$20.56.

All it takes is just one trade like this a week.

***"I just wanted to say how great your newsletters are. I love how you combine so many aspects of technical analysis (support, resistance, stochastics, POH, Fib retracements and Elliot wave) to make it so clear when to get long and when to get short. The best part is how I have started to make money by following your recommendations. Keep up the great work,"***  
**Steve -- New Haven, CT**

Who else wants to earn money each week in the stock market? Here's how you can:

- Receive a newsletter each weekend and Wednesday evening with a summary of the market activity, an update on our current positions and performance and most importantly, a watch list of stocks poised to potentially deliver strong short-term gains.
- Receive a Trade Trigger email alert as soon as one of the stocks on our watch list triggers a trade
- Receive a Locking In Gains/Stop Loss email alert as soon as we are locking in gains in a stock we are holding -- or if our stop loss is hit.
- Receive an email alert when a new stock has completed a set-up poised to potentially deliver significant short-term gains
- A true market partner helping you develop and execute a solid trading plan delivering consistent profits to

you
